

AutoBond
A BOND OF AUTO SAFETY

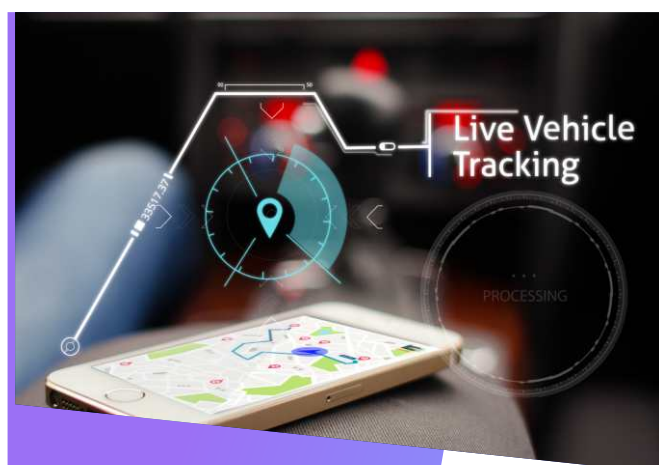

Get real-time updates about your vehicles on your smartphones

Living in the age of convenience, we are in constant search of tools that can simplify the complexities of our lives. Take for example, our vehicles. Difficulty in spotting our car in a packed parking space, fear of two-wheeler being stolen, or towed away by the traffic cops, and remembering the service due date are some of the headaches we live with. But what if someone says there's a smart tool to fix all this woes?

Make way for Basecamp AutoBond, a GPS-enabled app for both iOS and Android devices. AutoBond is an advanced telematics solution for vehicle status monitoring, tracking and studying customized driving behavior, which gives you precise updates and timely alerts about your vehicles - two-wheelers, cars, & other four-wheelers - on your mobile devices.

AutoBond is aimed to offer you unprecedented convenience and a pleasant time out on the roads through real-time updates as well as a host of advanced safety features such as live online as well as offline vehicle tracking, emergency alerts, anti-theft alerts, vehicle status, driving behavior analysis, and service due reminders, among others.

Basecamp AutoBond app's features:

GPS Security System: AutoBond has an inbuilt, highly-sensitive GPS chip which sends vehicle's correct location at any given time.

Live Tracking: With AutoBond, users can live track their vehicles - both online & offline - and get their real-time location.

Navigate To Vehicle: This feature navigates the users to the accurate location of their vehicle in the parking.

Anti-Theft Alarm: AutoBond comes with an anti-theft alarm, which is automatically triggered in the event of attempted theft.

Driving Behavior Analysis: AutoBond enhances user's driving ability by providing analysis on user's driving behavior on different parameters.

Scorecard: Users can see the vehicle scorecard based on parameters such as hard braking, acceleration, average speed, etc.

Geo-fencing: Users can create geo-fenced area marked as safe zone for the vehicle, and get notified every time the vehicle violates it.

Live Vehicle Status: Users can remotely check their vehicle status at any given time; whether it is parked, running or idle.

Service Due & Insurance Date: AutoBond generates timely service & insurance due reminders, helping the users maintain the vehicles and keep them current on insurance.

Analytics: AutoBond's Analytics feature allows users to generate and view interactive daily statistics about their vehicles, and conduct real-time analysis of the same.

Guest Users: Users can add three-four guest users and grant them access of the vehicle.

Near By: Users can see the nearby fuel and air stations and act accordingly in case of an emergency situation.

Playback Tracking (History Video): With AutoBond, users can see the location history of their vehicle by selecting the required time slot.

Miscellaneous: AutoBond has other vital features such as multiple-language support, camera support, and multiple-vehicle support on single device, among others.

AutoBond
A BOND OF AUTO SAFETY
